## Compliance Brief: GDPR

The European Union (EU) Parliament approved the General Data Protection Regulation (GDPR), which went into effect May 2018, and is designed to protect EU citizens' personally identifiable information (PII). It applies not just to EU-based companies, but any company collecting PII on EU citizens. According to GDPR.eu, noncompliance could cost $23.4 million, or 4% annual revenue, whichever amount is higher. PaperVision® can help you secure your business documents and enable compliance with GDPR.
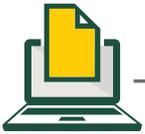

Any Document.

- Leverage our patented artificial intelligence (AI) engine to recognize and sort PII from information not requiring protection.
- Track all user activity for any document within the application, including attempts at accessing protected data without proper security clearance.

Anywhere.

- Enable administrators to instantly respond to customers requests to update or delete their data, improving the organization's ability to maintain compliance from anywhere.
- Combine multiple systems with simple point-and-click integrations to ensure GDPR requirements are being maintained across the entire organization.

Anytime.

- Document tracking ensures audits are a breeze and can be performed automatically, saving the entire organization not only time but money.
- Cloud information management applications ensure secure, fast, and productive accessibility to business information, no matter your location.

"The risk of bad privacy practices is skyrocketing. If the direct cost of failing to reach compliance isn't enough of a motivator, consider the costs you'll face by alienating customers with dark patterns or relying on creepy surveillance data."

- Fatemeh Khatibloo, VP, Principal Analyst

FORRESTER®

What if you could ensure all your organization's data was in compliance with GDPR 100% of the time? With the PaperVision product suite, you can comply with GDPR regulations, protect customer data, and enforce system security standards.

Securely Protect Data

Is your data protected in accordance with GDPR regulations? Under GDPR, organizations must securely protect customer data from unauthorized access. With PaperVision, you can ensure your customer's private information is securely protected 100% of the time with document encryption during transmission and at rest.

Respond to Requests Quickly

Did you know that your customers have extended rights under the GDPR? Customers can now confirm consent of how their information is being used or request you delete their data. PaperVision has powerful search functions that allow you to locate, update, and send information electronically in seconds. Improve the speed of information requests and ensure you stay in compliance.

Safe from Disaster

Is your organization's data safe if disaster struck? Electronically protect files from not only unauthorized access, but loss, theft, and natural disasters. With PaperVision, you know your files are always protected safely in the cloud, allowing you to recover from any disaster quickly.

Easily Maintain Audit Trails

Can you pull up the history of every document you have? Under GDPR, organizations must track all user activity, including attempts at accessing protected data without proper security clearance. With PaperVision, document tracking is automatically applied making audits a breeze, saving you valuable time and money.

Save Money by Ensuring Compliance

Can you afford to be in violation? Under GDPR, organizations can be subject to fines up to $25 million or 4% of their annual revenue, whichever is larger. PaperVision provides multiple layers of security, including transmission, system, data, and application security to reduce the time and money your organization has to spend trying to ensure compliance.

Integrate Seamlessly

Do you work with multiple systems? Make complying with GDPR simple by combining multiple systems. PaperVision comes with easy to use point-and-click integrations that make it quick to securely integrate customer information with other line-of-business applications.

"With the help of PaperVision® Capture and PaperVision® Enterprise, we're able to ensure the protection of more than 10,000 records. Vulnerable information is no longer just sitting in drawers."

- Mary Peelen, Director of Health Information Services, MHCD
