

Connect stores securely using easy, efficient content management

It isn't a question of whether you need information technology, it's a matter of which IT system offers you the best return on investment and helps you comply with government, legal, and industry regulations such as the Payment Card Industry Data Security Standard (PCI DSS), which is a set of criteria to protect customer credit card information. Digitech Systems offers effective, secure and beneficial Enterprise Content Management (ECM) to help with compliance and other challenges facing retailers.

The PaperVision® product suite enables you to:

- Increase efficiency by reducing time wasted searching for information.
- Comply with PCI DSS using advanced data security.
- Connect multiple store, office and warehouse locations in a centralized ECM system.

Gain efficiency for you and your customers

Managing supply chains efficiently, quickly introducing products and maintaining inventory accuracy are essential to meeting customer service expectations. The PaperVision product suite eliminates paper-based record keeping processes that stifle productivity and profitability. Features like enterprise search and electronic distribution build efficient business practices.

- Scan, index and organize documents to simplify management.
- Instantly retrieve any document, including email, to answer questions quickly.
- Distribute information electronically via email or secure internet connection rather than copying, faxing or mailing.
- Connect multiple locations to a single information management system.

"Since implementing PaperVision Enterprise, I have noticed a huge improvement in employee morale. Our staff is empowered to quickly and effectively manage the information they need to do their jobs."

- Ernie Bullard, Controller, United Natural Foods Inc.

Maintain the highest level of security for regulatory compliance

Security is the number one concern in retail, and you need an information system that can withstand security threats. PCI DSS is designed to help retailers protect customers' credit card information. PaperVision® Enterprise and ImageSilo® enable you to meet regulatory requirements and improve control.

- Control information access by user, project or document, and limit users' abilities to view, change and share information.
- Ensure data is always protected using encryption during transmission and storage.
- Store information off-site in a state-of-the-art data storage facility, and restrict user access with multiple layers of security.

"We can respond to customers more quickly - in most instances, while they are still on the phone. From an operational efficiency and customer service perspective, our return on investment has been instantaneous! Plus, we expect to save more than \$45,000 in the first year with PaperVision Enterprise. We couldn't be happier. "

- Kyle Smith, Special Projects Manager, CAPCO Tile & Stone

Reduce costs, increase sales and save money

IT investments can become a competitive edge. Not only can you save money through operations, but you also gain opportunities for sales increases from improved customer service and process efficiency. Implementing a content management system enables you to:

- Convert to electronic records and save on paper, postage, storage and distribution costs.
- Improve customer service with fast access to secure customer records from anywhere.
- Remove filing systems and increase available showroom space.
- Decrease training expenses by avoiding multiple software applications.

Key Features:

Cloud ECM with ImageSilo® provides secure online information access for multiple store locations

Security controls safeguard customer information and protect credit card information.

Outsourcing ECM services enables retailers to trade high capital costs for low monthly operating expenses.
