

Is your PHI protected in compliance with HIPAA?

Enforced by the US Department of Health and Human Services (HHS), The Health Insurance Portability and Accountability Act of 1996 (HIPAA), requires anyone who handles medical information such as healthcare providers and insurance companies, to secure Protected Health Information (PHI), exchange data electronically, and protect patient information. The PaperVision® suite lets you electronically manage patient data and records, helping you avoid noncompliance penalties and costly fines.

Any Document.

- Integrate seamlessly with your existing Electronic Health Records system. Added benefits include enhanced control and security of your patient records and information.
- Easily capture, sort and index any paper or digital health record using our intelligent automation. The process is quick and accurate.
- Convert paper records into secure electronic files to maintain HIPAA compliance.

Anywhere.

- Access documents from the workplace or remotely using desktop or mobile devices.
- Never hand-carry documents around again. Document reviews, sign-offs and other tasks can be assigned, routed and completed easily -- and securely -- right from each authorized worker's computer.
- While authorized users can access records from anywhere, strong security settings block unauthorized internal and external access. Detailed audit trails keep a record of who handles documents, when and why.

Anytime.®

- Access files and other electronic data 24 hours a day, 7 days a week, 365 days a year.
- Quickly respond to requests for information from patients and other healthcare providers. Securely share the records electronically.
- Automatically output healthcare claim files in approved HIPAA 837P EDI ANSI format.

"While no healthcare organization wants to expose sensitive data or have health information stolen, without HIPAA there would be no requirement for healthcare organizations to safeguard data – and no repercussions if they failed to do so."

- HIPAA Journal

Is your PHI protected in compliance with HIPAA?

What if you could ensure your organizations' medical records and patient information are being protected in accordance with HIPAA regulations? With the PaperVision® suite, you can ensure the confidentiality, integrity, and availability of all your data in one easy-to-use electronic system, making HIPAA compliance a breeze.

Manage Records Electronically

Is ensuring HIPAA compliance a challenge for your healthcare organization? HIPAA requires organizations to securely and electronically manage, protect, and store patient records. ImageSilo® offers cost-effective cloud storage that allows you to easily convert all paper records to electronic files, enabling you to be HIPAA compliant.

Securely Protect PHI

Are your patient records secure? Under HIPAA regulations, PHI must be electronically protected to ensure the confidentiality and integrity of all patient information. The PaperVision suite provides extensive security and encryption settings to ensure patient data remains secure while in transmission and at rest.

Send PHI Electronically

How long does it take your organization to respond to patient requests for information? Under HIPAA, patients can ask for electronic copies of their medical records. With the PaperVision suite, you can securely share information electronically with external parties, ensuring information requests can be responded to quickly.

Intelligently Capture PHI

Is your organization still collecting patient information by hand? Manual data entry can be an unsecured and error-prone process, leaving you vulnerable to a HIPAA violation. With the PaperVision suite, you can utilize IA to automatically extract and index patient records to streamline medical record processing.

Quickly Process Claims

How much time does it take your organization to submit healthcare claims? PaperVision Capture offers optional business rules that allow you to verify claims against the national database before automatically generating the correct ANSI 837 output to save you time and money when submitting claims for payment.

Unify Multiple Systems

Are your medical and patient records located in different systems? Manually managing patient information across various platforms can leave sensitive information vulnerable to theft. Easily integrate your existing EHR system with the PaperVision suite to ensure sensitive information remains safe.

"With the help of PaperVision Capture and PaperVision Enterprise, we're able to ensure the protection of more than 10,000 medical records. Plus, we are better able to comply with HIPAA because vulnerable information is no longer just sitting in drawers. This has saved us more than \$259,000 annually!"

-Mary Peelan, Director of Health Information Services, Mental Health Center Denver
